Subject: Malt Beverage Excise Tax Reporting

The filing method for State malt beverage excise tax has changed to an online format. Wholesalers are no longer required to report package sizes on their monthly return. This is done since the tax rates are based either on ounces or barrels and package size is not needed. They will now report ounces and barrels on the State monthly return. The wholesalers will still need to report their sales to the local taxing authority in the manner previously used. They will report the ounces and barrels to the local authorities, and will not be required to provide package sizes. This notice is also posted on our website at <https://etax.dor.ga.gov/AlcoholTaxesHome.aspx>.
